

FASHION TV - NEW APSTAR 7 FREQUENCY 3780V

Dear Customer,

FashionTV uplink of Austria Telecom is located on high mountain peak in the Austrian Alps. Due to global warming, the weather conditionals in the mountains has changed dramatically and caused many interruptions in transmission.

In order to upgrade Apstar and FashionTV decided to move uplink to Apstar Hong Kong. As of today/25.7.18/ FashionTV SD and FashionTV HD are moved to transponder 4B and frequency **3780V**.

Please confirm that you are switching the signal. We regret inconvenience however due to expected heavy thunderstorms for the summer this is force majeure.

For more questions regarding the technical details, please contact:
